PROFILE

I am a professional web developer with 1 experience year in backend side working in a CRM project. I define myself as a strong creative and analytical professional. I'm constant updating myself on IT technologies, I don't stop in my study way.

To get a stronger profile, I studied in a fullstack bootcamp to get some knowledge at frontend development side, learning to connect frontend with backend side.

WORK EXPERIENCE

Backend developer in CRM Project

Feb. 2023 - Jan. 2024

I have participated in the construction of an administrative CRM that had 7 micro-services, participating in 2 of that microservices with Javascript as a programming language. Each one of that microservices where configured relational and no relational databases MongoDB and PostgreSQL. Code implemented in that projects had been implemented with sustainability, scalability and clean code, thanks to the fact that it has been developed using an architecture of layers and applying SOLID principles.
